Motivational Letter

I have over 5 years experience as a business analyst, a role that I fully embraced as a Solutions Architect. Over the years, the most fulfilling achievements is not just 12 tenders I won for Meso Group, but the entire process of drafting a technical and financial solution that is second to none. Experience have insighted the reality that the biggest workload rests in proper project management to deliver customer expectations and KPIs setout.

In the IT business community, the connections and enterprise relations with customers and companies has made me a brand. Having sat in boardrooms with CEOs and executives of big and small firms, my business acumen is timeously refined.

I possess an eloquent technical background, having experience in most technical fields such as telecommunications and software development.
